Take the *1st* Step In Environmentally Preferred Carpet Cleaning

ENVIRONMENTALLY PREFERABLE

- *Non-toxic.
- *Saves water.
- *Saves energy.
- *100% plant-based.
- *Safe for children and pets.

EASY TO USE

- *No waiting for the carpet to dry walk on your carpet immediately after cleaning.
- *No chemicals to mix.
- *No filling and dumping of heavy, messy water tanks.
- *Clean the whole carpet, or just where it's dirty.

HOW OUR SYSTEM WORKS

The Dry Extraction Carpet Cleaner is a soft, natural product that is environmentally friendly. We don't soak your carpets with water!. This low moisture organic sponges are moistened with water, detergent and small amount of safe solvent. Think of the carpet pile as a vertical surface, like a wall. If you use too much liquid, it will run down the yarn toward the carpet backing, just as too much liquid runs down a wall. If you allow this dissolved dirt to run down the backing, it can be more difficult to remove and

The soft, organic, natural SPONGES which is moistened with water, detergent and a small amount of safe solvent to dissolve and absorb both water based and oil based dirt. And because these SPONGES is a low moisture cleaning system, once the cleaning is done, the carpet is dry and ready to use immediately.

Chemical and mechanical action is required to break the oil bond and pull the dirt away from the carpet fibers. Then this loosened dirt must be removed. The organic sponge is formulated to dissolve both types of dirt and then to absorb it. This cleaning system doesn't leave a sticky residue to cause rapid resoiling.

A trace of SPONGES may remain in the carpet after vacuuming but it is not abrasive or harmful. This trace amount of SPONGES will be removed with subsequent vacuumings.

DID YOU KNOW?

Products or equipment that advertise they remove dust mites and mold from the environment are under the jurisdiction of the EPA and must be made in an EPA registered facility. The carpet cleaning machines we use are manufactured in an EPA registered facility, EPA Establishment Number 074202-WI-001.

WHY CLEAN WITH OUR SYSTEM

Think about this for a moment: if a wet carpet cleaner extracts dirty water from a carpet, but the carpet is still wet, is the water left in the carpet clean or dirty?

Now consider cleaning your carpet green and dry with Green Steps Carpet Care:

- *No wet carpet.
- *Environmentally preferred.
- *Spots won't come back.
- *Carpet stays cleaner longer.
- *0% Downtime. (No wet carpet means it is ready to use right after clean)
- *Lifts matted carpet pile.
- *Removes dust mites, mold and other allergens.
- *Safe for children and pets.
- *Safe for all carpets, even Orientals and sisal.

THE CHOICE IS CLEAR : Green Steps Carpet Care WONT SOAK YOUR CARPETS AND IT IS BETTER THAN WETTER!!
